Electronic document management

eMan is an electronic document management solution that enables all maintenance and repair documentation required to service an aircraft to be immediately accessible to everyone, everywhere, anytime. eMan is device independent and data is delivered using thin-client technology providing users access regardless of location over extremely small bandwidth connections. It features single, centralized storage of all electronic format documentation and applications. The browser based application that provides full administration facilities to manage and control access to all electronic format documentation and applications.
